---

On July 18th, 86 hardworking students without PCs at home arrived at Kramden Institute to pick up their newly refurbished computer during our Mini Geek-A-Thon and Award Day. Students were asked "How will your new computer be helpful to you and your family?" Take a look at some of their responses:

### **Tia E., 8th Grade**

My computer will be helpful in most of my school work in the coming years. My mom and I will not have to go to the public libraries to get information or school assignments and work related job searches for my mom. I would be able to do all of my reports and studies. I am so excited. Thank you all very much!

### **Emmanuel M. (2nd grade) and Janvier M. (4th grade)**

Emmanuel- I want a computer because it will help me to develop my english, to cumminicate with others. From the computer, I will know how to calculate... The computer is my library.

Janvier- I want a computer because it will help me to know more about it. For me, the computer is a mystery, but is a moment to know more things about it. The computer is my heart. When U learn, my family will learn.

### **Isaac A. (Kindergarden)**

I have 3 brothers, they are age 11, 7, and 4. Having a computer will help us learn to use a computer and to learn more with learning games. My oldest brother is going into Jr. High and he will be able to do his research and papers on the computer.

### **Mark R. (12th grade)**

This will be helpful because not only will it help me with work for projects, and job resumes, but it will also help me complete all of my work for school

### **Jaylen C. (2nd Grade)**

I can do homework and learn. I can learn about animals.
